SURVEY INFORMATION SUMMARY

LIMITED ENERGY STUDY OF HISTORIC RED BRICK AREA, FT. BRAGG, NC
SURVEY FORMS

The following pages include the survey forms of information gathered during the survey of the 12 Red Brick buildings for ECO-1: Install High Efficiency Lighting systems. Each form includes the specific lighting system information by building and the building's functional areas, such as corridors, latrines, offices, etc. Below is a listing of the minimal amount of information gathered for each functional area within each building.

- 1) room name or type
- 2) lighting fixture type
- 3) lamp type
- 4) number of lamps per fixture
- 5) watts per lamp
- 6) number of fixtures per room or area
- 7) ballast's amp factor
- 8) operating "on" or "off" electrical peak
- 9) light level reading in footcandles
- 10) additional comments, including unique operating hours, unique fixture layout, unique day lighting conditions affecting light levels, unique building conditions

The operating hours are stated under the facility information at the top of each page. If a particular area within a building deviates from the building's operating hours, it will be noted in the comment section of that area. Operating hours were determined from a combination of occupant interviews, survey observations by Systems Corp and Systems Corp's previous experience at army installations.

All Red Brick buildings surveyed, except for Building 1333, had lighting fixtures which were significantly aged and discolored. For this reason, Systems Corp determined that the lighting systems in these 11 buildings would require a lighting replacement project within the next ten years whether this project is funded or not. This replacement project would probably replace the lighting system with the same systems, such as T-12 lamps and electronic ballasts. Therefore, Systems Corp used 80 percent of the estimated high efficiency lighting project costs as an estimate of the price of the replacement project and included them in the non-energy, non-recurring savings. Building 1333 was renovated within the last two years, so no replacement cost savings were included in this project.

SURVEY INFORMATION SUMMARY

*LIMITED ENERGY STUDY OF HISTORIC RED BRICK AREA, FT. BRAGG, NC
SURVEY FORMS*

A majority of the areas surveyed in the 12 buildings used T-12 four-foot-lamps in various fixture style configurations. A couple of areas surveyed had slightly high footcandle readings for the particular area's function. This allowed a reduction in the number of lamps from four to three, or three to two, in each fixture. In a few areas, the number of fixtures could be slightly reduced to allow the new system to reflect the proper light levels, but this would require a significant investment of manpower and labor to rearrange the fixture layout. For this reason, only a one-for-one fixture replacement in the fluorescent lighting systems was evaluated; otherwise, the project would lose its cost effectiveness.

EXIT SIGNS		INC	2	20	2		ON		OPERATING HOURS - 24 HR/DY

GENERAL INFORMATION:

PROJECT NAME: Fort Bragg - Limited Energy Study
 PROJECT NO.: 94013.05

SURVEY DATE: 22 SEPT 94
 SURVEY TEAM: JAH/MWG

NOTES: 1/2 OF FIRST FLOOR IS CLOSED OFF - TO BE RENOVATED (LEFT)

RIGHT 1/2 OF BLDG IS A CONTROLLED ACCESS - WE COULD NOT GAIN ACCESS.

NOTES: OPERATING 24 HR/DY ARE 7DN/WK

* R = RECESSED, S=SURFACE, P=PENDANT, ST= SHOP TYPE, W=WALL MOUNTED & G=GLOBE

** F=FLUORESCENT, INC=INCANDESCENT, MV=MERCURY VAPOR, MH=METAL HALIDE & HPS=HIGH PRESSURE SODIUM

SystemsCorp Project No. 94013.05

Building Envelope Survey Information:

Building Number: 2-1549 Building Section: All

Roof	
Type of orientation	FLAT WITH CLORESTORY SECTION RUNNING DOWN MIDDLE
Construction type	BUILT UP ROOF ON METAL FRAME
Insulation type/thick	1" RIGID BOARD
Ceiling type	NONE

Notes: _____

Wall	
Construction type	BRICK & BLOCK
Insulation type/thick	NONE
Interior finish	PAINT

Notes: SINGLE PANE WINDOWS 10' HIGH ALL AROUND

TOP 5' PAINTED OVER

CLORESTORY 6'6" HIGH ALL AROUND

Floor	
Construction type	SLAB ON GRADE
Insulation type/thick	NONE
Interior finish	NONE
Below grade depth	0'

Notes: _____

Fort Bragg EEAP Survey
SystemsCorp Project No. 94013.05

Building Envelope Survey Information:

Building Number: 2-1728

Building Section: ALL

Roof	
Type of orientation	PITCHED
Construction type	WOOD FRAME ON CONCRETE SLAB
Insulation type/thick	NONE
Ceiling type	LAY-IN

Notes:

Wall	
Construction type	4" BRICK AND 8" BLOCK
Insulation type/thick	NONE
Interior finish	GYP. BOARD, PAINT

Notes: INSULATING WINDOWS 48" H x 30" W

GOOD WEATHER STRIPPING AND CAULKING

1/4" CRACK ALL AROUND EXTERIOR ENTRANCES

Floor	
Construction type	SLAB ON GRADE
Insulation type/thick	NONE
Interior finish	NONE
Below grade depth	4'

Notes:

Building Envelope Survey Information:

Building Number: 2-1731 Building Section: 4U

Roof	
Type of orientation	PITCHED
Construction type	WOOD FRAME , CONCRETE ROCK , SHINGLES
Insulation type/thick	NONE
Ceiling type	LAY-IN

Notes: _____

Wall	
Construction type	4" BRICK & 8" BLOCK
Insulation type/thick	NONE
Interior finish	PAINT

Notes: INSULATING WINDOWS 48" H x 30" W

Floor	
Construction type	SLAB ON GRADE
Insulation type/thick	NONE
Interior finish	NONE
Below grade depth	4'
